Description:

Powerex Intellimod™ Intelligent Power Modules are isolated base modules designed for power switching applications operating at frequencies to 20kHz. The New Active Filter Intelligent Power Module (AFIPM) includes protection circuitry for the IGBT.

Features:

- ☐ Variable DC Output Voltage Control Function
- ☐ Soft Start Function
- ☐ Protection Logic
 - Output Voltage Repression
 - Output Over Voltage
 - Under Voltage Lockout
 - Over Temperature
 - Short Circuit Current

Applications:

- ☐ Front End for Pulse Amplitude Modulation (PAM) Motor Control
- ☐ PFC (Power Factor Correction)
