

Schematic

Description:

The Powerex Common Cathode Series Modules utilize field proven super fast H-series FWD chips necessary for fast switching applications. The terminal design of the module allows for parallel operation of the internal diodes, providing the user with either dual common cathode connected diodes, or a single diode rated at twice the current of the dual (by connecting pins 1 & 3 together). Two (2) terminal heights are available (30 and 36mm) to facilitate matching existing power modules, making bussbar connections fast and economical. As with all Powerex modules, the series are electrically isolated for easy mounting with other components on common heatsinks.

Features:

Powerex FLEX-TERM terminals

Parallel Diodes for up to 600A

Isolated Mounting 2500Vacrms

H-Series Planar Chips

Applications:

Inverters

Choppers

Welding Power Supplies

High Frequency Rectifiers

Switching Power Supplies

Free Wheeling Diode

Regenerative Braking

Preliminary Common Cathode Series
