

Schematic

Description:

The Powerex Single Fast Diode Series Modules utilize field proven super fast H-series FWD chips necessary for fast switching applications. Two (2) terminal heights are available (30 and 36mm) to facilitate matching existing power modules, making bussbar connections fast and economical. As with all Powerex modules, the series are electrically isolated for easy mounting with other components on common heatsinks.

Features:

Powerex FLEX-TERM terminals

Isolated Mounting 2500Vacrms

H-Series Planar Chips

Applications:

Inverters

Choppers

Welding Power Supplies

High Frequency Rectifiers

Switching Power Supplies

Free Wheeling Diode

Regenerative Braking
